THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE OF THE UNITED STATES, WITHIN THE MEANING OF TITLE 18, SECTIONS 793 AND 794, OF THE U.S. CODE, AS AMENDED. ITS TRANSMISSION OR REVELATION OF ITS CONTENTS TO OR RECEIPT BY AN UNAUTHORIZED PERSON IS PROHIBITED BY LAW. THE REPRODUCTION OF THIS FORM IS PROHIBITED.

THIS IS UNEVALUATED INFORMATION

50X1-HUM

1. The Makoszowy coking plant near Zabrze (Hindenburg - Q51/Y47) had two large Czech automatic coke ovens and a fire tower installed during 1951 by a team of Czechs.
2. In March 1952, Huta Labedy, Labedy (Laband - Q51/Y38), began the production of two new kinds of pig iron. Modified treatment pig iron (zeliwo modyfikowane) and spherical pig iron (zeliwo sferoidalne) are the two pig iron types developed by a secret process by the Main Foundry Institute (Glowny Instytut Odlewniczy) in Krakow. The new pig iron types are substitutes for steel and the modified treated kind is one and a half times as strong as ordinary pig iron whereas the spheroidal type is twice as strong (sic).
3. An electric motor manufacturing plant with three workshops is being constructed at Tarnow (R51/Z94). One of the workshops is to be operative in 1952.
4. A drying chamber, a coal grinding mill and the mechanical equipment for handling coal dust were installed at the thermal power station in Jaworzna (R50/Y85). Three new turbo generators with a rating of 80 mw are to be installed at this station in 1953.
